

Global Pigs

- a world of difference

More openness and transparency

Globalpigs is a European export company founded in the desire to create and optimize results.

We are different in that we seek to create more openness and transparency than what is the norm in the field. That's because we believe intimacy and openness creates the foundation for strong relations and good credibility. In other words, we want to make long-lasting and fruitful cooperation possible, to the benefit of European pig farmers.

Shortens the route from seller to buyer

Global Pigs as a partner gives you a company that:

- Is part of the Danish breeding system, Danbred
- Only delivers quality pigs
- Declared health
- Gives a fast response
- Is flexible
- Shortens the route from seller to buyer
- Enables a good, long-lasting trade
- Gives transparency in the trade cycle
- Obtains the best deals

Ambition

It is our ambition that at any time pig farmers from Italy, Romania, Deutschland or any other country in Europe is able to find his or her supplier of pigs, and to see the supplier's herd size, health status, food plans and more.

Professionalism

With transparency and professionalism, we lead the way from supplier to buyer. We'll produce trust that the health status a pig is bought with is the one it's brought with.

Share our knowledge

It's our opinion, that the only reasonable future for European pig farmers is strong cooperation. Denmark has high status regarding pig breeding, but if we want to remain in a position of respect we must share our knowledge and breeding techniques with our colleagues in the rest of Europe. Together, we can meet the demand in quality of the citizens around the world.

Good cooperation

Standardization, high quality, security of delivery, welfare and price are some of the parameters where we must be able to compete at once.

In the future we have to be flexible enough to shift focus between for example price and welfare depending on the market, and we must do this together.

Good cooperation between European pig farmers is our goal.

The Foundation:

Good breeding pigs is the foundation of your economy. At Global Pigs we strive to find the best breeding pigs, deals with the best in the business and we accept nothing but first class pigs. All breeding pigs are tested, indexed and belong to the elite among Danish breeding pigs.

The good End Result:

It is of great importance to have a good start if you want to reach a good end result. Danish production pigs are the best when it comes to growth and health, and in and of that; economy. With a high daily growth, low feed-, and medicin usage you will reach good results and optimize your economy the most.
